THOBILE NDODA SEMA

Cloud Engineer | AWS | DevOps

Johannesburg, Gauteng | +27 83 813 3619 | thobilesema@gmail.com

LinkedIn | GitHub | Portfolio | Credly

PROFESSIONAL SUMMARY

Cloud-focused IT professional with 2+ years of software development and infrastructure experience supporting Linux hosting environments, application deployments, DNS, email services and production troubleshooting. AWS Certified Cloud Practitioner and AWS re/Start graduate with hands-on experience building AWS solutions using EC2, Lambda, S3, CloudFront, IAM, CloudWatch and Route 53. Experienced with Linux administration, Docker, Git, networking and troubleshooting.

CERTIFICATIONS AND CLOUD TRAININGS

AWS Certified Cloud Practitioner (CLF-C02) - Amazon Web Services | 2026

AWS re/Start Graduate — AWS / Praesignis | 2026

AWS SimuLearn: Cloud Computing Essentials | Amazon Web Services

Introduction to Cybersecurity | Cisco Networking Academy

KEY SKILLS

- **Cloud & AWS**: EC2, IAM, S3, Lambda, CloudFront, CloudWatch, Route 53, Security Groups
- **Linux & Infrastructure**: Linux, Ubuntu Server, SSH, Nginx, cPanel, DNS, SSL/TLS, web hosting
- **DevOps**: Docker, Docker Compose, Git, GitHub, GitHub Actions, CI/CD
- **Networking**: TCP/IP, DNS, HTTP/HTTPS, ports, network troubleshooting

- **Programming**: Java, Spring Boot, PHP, CodeIgniter, JavaScript/TypeScript, Node.js, Python, REST APIs
- **Databases**: PostgreSQL, MySQL, MongoDB
- **Operations**: Monitoring, log analysis, incident troubleshooting, root-cause analysis, technical documentation

PROJECTS

Secure AWS Linux Web Server
AWS EC2 | IAM | Security Groups | Ubuntu | Nginx | SSH

- Provisioned and administered an Ubuntu EC2 instance.
- Configured least-privilege IAM access and hardened inbound traffic using security groups.
- Installed and managed Nginx and validated service recovery after reboot/failure.
- Created an operational outage runbook and documented troubleshooting procedures.
- GitHub | Details

AWS Serverless Contact Event Logger
AWS Lambda, Python, CloudWatch, IAM, Function URLs, Postman

- Built a serverless application that receives, validates, and processes JSON requests through an HTTPS Lambda Function URL.
- Configured IAM execution permissions and used CloudWatch Logs for monitoring and troubleshooting.
- Tested the API endpoints and request-handling behaviour using Postman.

AWS Static Website Hosting
Amazon S3, CloudFront, IAM, Route 53

- Deployed a static website using Amazon S3 and delivered its content securely through CloudFront.
- Configured HTTPS delivery, custom-domain DNS records, and Route 53 integration.
- Applied least-privilege IAM permissions and maintained the website through AWS services.

Cloud Portfolio Deployment
Cloudflare Pages, GitHub, DNS

- Deployed a version-controlled portfolio website using GitHub and Cloudflare Pages.

- Configured a custom domain and DNS records and resolved deployment and accessibility issues.

PROFESSIONAL EXPERIENCE

Software Engineer
Samddra | Sep 2026 - Present

- Develop and maintain the SAMDDRA membership platform, implementing membership, certification, finance and resource-management functionality.
- Support deployment and infrastructure planning for containerized application workloads using Docker and Linux-based hosting.
- Configure and troubleshoot domains, DNS, application services and production environments.
- Implement and maintain deployment workflows using Git and GitHub Actions.
- Investigate application and infrastructure issues through logs, testing and root-cause analysis.

Software Developer
4levels Solutions | May 2024 – May 2026

- Managed IaaS hosting and cPanel environments, including application deployments, domains, databases, user accounts, email services, hosting configurations, and basic security settings.
- Contributed to ABii, a learning management system supporting student registration, course enrolment, payments, and access to learning materials using Java, Spring Boot, Thymeleaf, PostgreSQL, and Docker.
- Configured and maintained business email services and resolved account-access, routing, delivery, and configuration issues.
- Developed features for EasyOnRamp, a digital-asset and stablecoin platform supporting purchases, sales, deposits, withdrawals, swaps, and payments using Node.js, Express.js, TypeScript, and Next.js.
- Enhanced the Samddra platform by implementing features, refining existing components, and resolving functionality and performance issues using PHP and CodeIgniter 4.
- Performed functional, usability, performance, and stability testing; documented defects and collaborated on corrective improvements.

IT Support & Systems Technician
Area Group | Freelance

- Provided technical support across websites, hosting environments, end-user devices and business systems.
- Configured and maintained domains, DNS records, email accounts and website-hosting services.
- Diagnosed and resolved hardware, software, hosting, email-delivery and network-connectivity issues.

EDUCATION

Advanced Diploma in Computer Science
Tshwane University of Technology | In Progress

- Relevant studies: Advanced Software Engineering, Distributed Systems, Service-Oriented Architecture, and Data Science.

Diploma in Computer Science
Tshwane University of Technology | 2024

- Best Learner Award recipient in both first and second year. Completed practical projects in software development, databases, algorithms, and web technologies, as well as Work-Integrated Learning.

National Senior Certificate
Tlakale Mashashane Secondary School | 2021

- Achieved distinctions in Mathematics and Physical Sciences, with academic recognition at school and education-circuit level.
